Regulatory Compliance Statement

REACH

For European Union's REACH Regulation (No 1907/2006)

At SemeaTech, we are profoundly committed to upholding the highest standards of safety and environmental responsibility in the development and production of our gas sensors, radiation sensors, sensor modules, and related products. We fully adhere to the EU REACH (Registration, Evaluation, Authorization, and Restriction of Chemicals) regulations, which are designed to safeguard human health and protect the environment from the risks associated with chemicals.

Our products are designed and manufactured with a thorough understanding of the chemical substances involved. We conduct comprehensive assessments of all materials used in our gas sensors, radiation sensors, sensor modules, and other products, ensuring compliance with REACH standards and promoting their safe and responsible use. Our proactive approach includes continuous monitoring and evaluation of our supply chain to ensure alignment with the latest regulations and directives.

Our commitment goes beyond mere compliance; we strive for innovation in sustainability. We are actively exploring alternative materials and processes that not only minimize environmental impact but also reduce waste and enhance the safety and performance of our products.

Together, we can contribute to a safer and healthier environment for all.
